

Versatile By Design

AB LITE™

Beautiful Walls And Outstanding Details

AB LITE is available in two different block shapes, AB LITE STONES and AB LITE ROCKS. These versatile blocks are perfect for small to mid-size retaining walls in both residential and light commercial applications. In addition, AB LITE is compatible with all larger Allan Block systems and can be used to accent AB retaining walls with color bands and texture panels. The design possibilities are up to you!

Half The Size, Twice The Utility

The AB LITE combines the patented design features of the larger Allan Block products with the utility of a small-block system. The single block shape allows you to build curves, angles, straight walls and steps from one block. AB LITE's interlocking top lip and bottom notch provide a perfect fit between blocks - every time. For a mid-size landscape block that offers easy installation and design versatility, go AB LITE!
